I recently had the opportunity to demo BC Management's new Custom Benchmarking Tool and found the data to be invaluable to both BCM practitioners and service providers alike. The tool's functionality allows for ease of use and the ability to quickly drill down to the data perspectives most important to the user. As a practitioner at a global organization, I particularly found benefit in the ability to measure my company's maturity against an industry peer group. The results of the data provided by the benchmarking tool have the potential to provide organizations and service providers with a more holistic and global understanding of the ever changing BCM industry.
